

AI-Driven QA Readiness Check List

Tick the boxes that apply to your team:

#	Question	Tick if YES
1	Do you still write most test cases manually?	<input type="checkbox"/>
2	Do your automated scripts often break after UI or logic changes?	<input type="checkbox"/>
3	Does test data creation slow down your test cycles?	<input type="checkbox"/>
4	Are you missing coverage in edge or security scenarios?	<input type="checkbox"/>
5	Do you still prioritize test cases manually?	<input type="checkbox"/>
6	Do you lack traceability between code changes and test coverage?	<input type="checkbox"/>
7	Are your test cycles getting longer, not shorter?	<input type="checkbox"/>
8	Do you struggle to scale QA without adding more people?	<input type="checkbox"/>
9	Are your test artifacts hard to find, outdated, or inconsistent?	<input type="checkbox"/>
10	Do you rely on gut feel over data to decide what and when to test?	<input type="checkbox"/>

Check Your Score

- 0–3 Ticks

→ You're on the right path. You may already have strong practices, but AI can still unlock serious efficiency.
- 4–6 Ticks

→ You're in the danger zone. AI can help stabilize your test process, improve speed, and reduce manual load.
- 7–9 Ticks

→ It's time. Your QA team is stretched. AI-driven QA will drastically improve quality, speed, and scalability.

Don't just automate—optimize.
Let Enhops help you test smarter.
